A Word About the Upcoming Lewisville Bond Election

It's no secret that Castle Hills residents love the four-legged members of our families. Now some fur babies who are not always as lucky as those who call Castle Hills home and our pets who sometimes get loose need our help. The upcoming Lewisville bond election has funding to help improve the Gene Carey Animal and Adoption Center.

The project will add more than 4,000 square feet including a surgical suite, additional large dog kennels, the ability to separate dogs and cats to minimize animal stress and provide additional office space. This is where you can find a full outline [proposal](#). The shelter improvement is budgeted at \$9,611,399, only a small portion of the much larger bond package.

I know that the staff works tirelessly to help animals in need, to spay and neuter and to promote adoptions. I hope all of us who

love our pets and think of them as part of our family will support these improvements.

The Castle Hills Trails Corridor Project

Another project on the upcoming bond issue is a new trail for the Castle Hills community. The Castle Hills Trails Corridor Project is part of Proposition C. The project location is in the Castle Hills area near Windhaven Parkway and Lady of the Lake Boulevard.

Phase 1 of the Castle Hills Trail Development will focus on the southernmost portion of the corridor running from Windhaven Parkway east to the utility easement, then north along the easement to the sports field (see a map [here](#)). The project will include a 12-foot trail, wayfinding signage, trail head, park furniture, and shade where possible. If funding allows design of future phases of the planned corridor can be included in the project. Total cost is \$4,905,000.

In-person early voting will be available April 22-30, including weekend hours. Election Day voting will be held Saturday, May 4. learn more at <https://bit.ly/2024bonds>.

Spring Has Sprung!

COMPLIANCE CORNER

.....

- **Treat weeds in the lawn with a post-emergent weed control:** Treat only the weeds, not the grass.
- **Fertilize your yard:** This is what helps make your lawn green and thicken.
- **Fertilize all trees and shrubs with a granular fertilizer made for trees and shrubs:** Don't rely on your lawn fertilizer to do this work.
- **Your lawn needs weekly mowing:** Don't bag, but mulch and don't scalp your lawn. Be sure to trim and edge the lawn as well.
- **Spring watering suggestions:** Water your lawn 15 minutes twice a week and landscape beds 15 – 20 minutes twice a week. You can set each station of your sprinkler system for the appropriate amount of time and this still keeps compliance with the Stage 2 water restrictions for Castle Hills, just be sure you are watering on the correct days.
- **Plant seasonal color:** Begonias or pentas in the sun and for shade you can plant impatiens or caladiums. There are many other plants to choose from, these are just some suggestions.
- Springtime is a good time to **mulch the landscape beds** for a fresh look: 1 ½ inches to 2 inches deep. Hardwood, pine bark, and cedar mulch are all good to use.
- **If your trees are a year or more old, consider removing the stakes (including parkway trees):** As the tree grows the part of the stake that is wrapped around the tree tightens and the tree can actually start to grow around it, potentially causing damage to the tree. Also, the tree being continually staked can make the root system not develop properly so the tree does not grow. If the stakes are no longer connected to the tree, please remove the stake and wire. It does not look good and it may be a safety hazard for pedestrians and animals.
- **Remove dead plants, grass and weeds from landscape beds (including around trees):**
Grass and weeds in landscape beds detract from the appearance of your home and the aesthetics of the community.

The Deed Restrictions and Design Guidelines that encumber your home requires:

“All landscaping shall be maintained in a neat, clean and healthy condition. This includes pruning, mowing of lawns, weeding, removal of litter, fertilizing, replacement of plants where necessary, the application of pest control substances, and the regular watering of all plant material.”
